25 de Mayo 540 - 3200 Concordia, Entre Ríos, Argentina

I am a computer engineering student and I have some years as a self-taught in frontend programming. I have a solid understanding of fundamental programming concepts and gained hands-on experience through a three-month training program as a senior developer trainee and various personal projects I built. My goal is to further develop my skills and knowledge in the field of frontend programming while effectively contributing to challenging projects.

EXPERIENCE

Trainee Frontend Developer (December 2022 - March 2023)

- Assisted a senior developer in creating and maintaining web applications.
- Participated in software development and testing, performing assigned tasks in specific projects.
- Gained experience in implementing interface designs using different versions of Angular, HTML, CSS and JavaScript.
